# Carlos Trujillo
## Software Engineer

My name is Carlos and I work as a Software Engineer for Sun Broadcasting. I enjoy solving problems; writing code and managing Linux containers is just a fun way to channel it. I have a Bachelor's in Automation Engineering, and my motto is "It can always be better." I love a good challenge, especially those that scratch the back of your head even when you're away from the keyboard. I love spending my free time playing soccer, writing, and enjoying music.
